Subject Index

R = Commission Report; Asterisk (*) = Nomenclature Report;
000–000 = inclusive page numbers of symposium/conference

Absolute configuration of *in situ* transition metal complexes from c.d. 441
Acid-base indicators, identification and control of purity 845R
Activation of C—H bonds 1897
Acyclic systems utilizing metal compounds, asymmetric induction in 1883
Aggregation with enhanced interchain orientational correlation 913
Agriculturally important samples, luminescent determination of 495
Alkali metals, assessment of melting, boiling, and critical point data 1407R
Alkaline errors up to 1 mol dm^{-3} Na^+, K^+, Li^+, determination of 887R
Alkaloids, pyrrolizidine and quinolizidine, stereochemical aspects of biosynthetic routes 453
Alloys, thermal plasma deposition of 1197
Allylic compounds, asymmetric isomerization of 1845
Amalgam electrodes in aq. solutions, standard potentials of 169R
Analysis, bulk and distribution, of semi-conductor materials 1133R, 1153R
Analytical problem solving in Lithium battery technology 383
Anisotropic molecules, rotation-translational coupling and bulk-viscosity relaxation of liquids composed of 247
Antiviral agents, some current developments 423
Aprotic solvents, ions-gas phase and solution-dipolar 339
Aqueous electrolyte solutions, structure as derived from MD simulations 1031
  inorganic phase equilibria at high temperatures 283
  mixtures to supercritical temperatures and at high pressures 1065
  solution structure, theoretical studies 1043
Arene transformation reactions via Cr complexes 1855
Aroma compounds, an important route to 693
Asymmetric induction in acyclic systems utilizing metal compounds 1883
  isomerization of allylic compounds 1845
  oxidation, short route to chiral sulfoxides using Ti-mediated 1911
  synthesis, catalytic, of cyclopropane-carboxylic acids 1839
  synthesis with boronic esters 1741
Automation and new technology in clinical laboratory, 2nd International Congress, Barcelona, October 1984 543–601

Bacteria, protein synthesis in, thermodynamic aspects of regulation 45
Basic ion reactions and kinetics in plasmas 1223
  mechanisms of energetic molecule ejection from surfaces 1245
Binary liquid organic mixtures, thermodynamics of 15
Biochemist's view of carotenoid metabolism in animals 679
Biochemistry, carotenoid, stable isotopes in 701
Biodegradation of carotenoids, a route to aroma compounds 693
Bioorganic studies with rhodopsin 769
Biosynthetic routes leading to pyrrolizidine and quinolizidine alkaloids 453
Blood cells
  red, cytometric approaches to 593
  white, morfometry of 599
Bond energies, metal-ligand, in organometallic compounds 79
Boronic esters, asymmetric synthesis with 1741
Bulk-viscosity relaxation of liquids composed of anisotropic molecules 247

^{13}C-labelled retinals, synthesis of 753
^{13}C NMR studies of poly (vinyl chloride) 1001
Calorimetric approaches to problems related to fossil fuels 69
Cancer prevention, carotenoids and 717
Carbon fibers, mesophase pitch and its 1553
Carbonyl oestrogen receptor assay 1865
Carbonylations, complex reducing agents in 1875
Carotenogenic enzymes from
  Capsicum chromoplasts 675
  Neurospora 667
  Phycomyces 671
Carotenoid(s)
  7th International Symposium, Munich, August 1984 639–821
  and cancer prevention 717
  biochemistry, stable isotopes in 701
  biodegradation of 693
  biosynthesis in plants 777
  in photosynthesis 723
  in plant photoprotection 729
  in rainbow trout, salmon and chicken 685
  metabolism in animals 679
  metabolites, natural, and synthetic analogs 709
  NMR of 801
  of lower plants, recent progress 649
  research, HPLC – a powerful tool in 793
  resonance Raman spectroscopy of 785
  structures, old and new problems 639
  structures in marine animals 659
  synthesis of optically active 735
  synthetic advances 741
Catalysis, organopalladium and nickel complexes relevant to 1799

Catalytic asymmetric synthesis of cyclopropanecarboxylic acids 1839
C—C bond formation
reactions of W, Mo, and Re enolates 1789
selective, based on organosilicon reagents 1759
Ceramic fine particles, thermal plasma deposition of 1197
C—H bonds, activation of 1897
Chalcogenides, ternary transition metal 1363
Characterization of solid polymers
by luminescence techniques 945
by size exclusion chromatography 955
thermotropic liquid crystalline 977
toughened polymers using fracture mechanics 1679
Chemical thermodynamics, International Conference, Hamilton, August 1984 1–103
Chemiluminescence immunoassay 523
Chemistry and physics of plastic flow 1707
Chiral copper carbenoid reaction 1839
polymers in solution, conformational analysis 931
sulfoxides, short route to, using Ti-mediated asymmetric oxidation 1911
Choice of fitting equations in critical evaluation of solubility data 255
Cholesteric phases in thermotropic liquid crystalline polymers 1715
Chromatography, size exclusion, characterization and analysis of polymers by 955
Circular dichroism, absolute configuration of *in situ* transition metal complexes 441
Clinical chemistry, impact of new technology on future of 565
Clinical laboratory
automation and new technology in, 2nd International Congress, Barcelona, October 1984 543–601
mass spectrometric techniques in 571
NMR techniques in 575
Clinically important samples, luminescent determination of 495
Cohesion parameters, applications in polymer science and technology 905
Collaborative
determination of total sterols in fats and oils 899R
determination of triglycerides in fats and oils 1515R
study of rheological properties and unstable melt spinning characteristics of linear and branched polyethylene terephthalates 1441R
Co-mediated steroid synthesis 1819
Complex reducing agents, applications in carbonylations 1875
Complexes of multi-charged anions with basic dyes 849R
Composite(s)
hybrid binders in polymer 1691
interfacial effects in 1667
materials, fiber surface treatment in 1659
polymer, 28th Microsymposium, Prague, July 1985 1639–1711
short fiber, achieving desirable mechanical properties for 1651
structures, processing of 1701
ultra high modulus polyethylene 1641
Conformational analysis of chiral polymers in solution 931
Conversion of light to chemical energy 57
Coordinate calculations, test data for normal 121R
* Coordination polymers, nomenclature for (Recommendations 1984) 149R
* Copolymers, source-based nomenclature for (Recommendations 1985) 1427R
Corona discharge, properties and specific uses 1353
Cr complexes, arene transformation reactions via 1855
Criteria for standardization of pH measurements in organic solvents 865R
Critical evaluation of
model ecosystems 1523R
solubility data in binary mixtures MCl–H_2O 255
Cu-catalyzed additions of organic polyhalides to olefins 1827
Cytometric approaches to red blood cells 593
Cytometry, aspects of quantitative 587

Data on transport properties of electrolyte solutions 1071
* Definition of pH scales, standard reference values, measurement of pH and related terminology (Recommendations 1984) 531R
Detection in liquid chromatography based on different luminescence principles 483
Determination of
mercury in foodstuffs 1507R
total sterols in fats and oils 899R
triglycerides in fats and oils 1515R
Deuteron NMR methods for studying molecular order in polymers 1617
Diagnostic potential of serum and urine glycosidases in acquired diseases 547
Dioxane, purification for electroanalysis 633R
Dissociation of molecules in plasma and gas: energy 1235
Double bond formation, recent advances 763

Electroanalysis, purification of tetrahydrofuran and dioxane for 633R
* Electroanalytical chemistry, terms, symbols, and definitions (Recommendations 1985) 1491R
Electrodes,
glass, procedures for testing pH responsive 887R
standard potentials of selected 1129R
Electrolyte(s)
local changes of solubility induced by 263
solutions, data on transport properties of 1071
transport properties of 355
Electron microscopy and diffraction of modulated structures 1373
Electrostatic interactions, local order due to 1051
Elementary processes in plasma-surface interactions 1253
Energetic molecule ejection from surfaces 1245
Energy, chemical, conversion of light to 57
Enthalpies of transfer to nonaqueous solvents 1103R
Entropies of transfer to nonaqueous solvents 1103R
Enzyme
immunoassays for detection of microbial antigens in body fluids 583
substrate reaction intermediates determined by resonance Raman spectroscopy 225

Enzyme, carotenogenic, from
Capsicum chromoplasts 675
Neurospora 667
Phycomyces 671
Epidemiological studies, carotenoids and cancer prevention 717
ESCA, applications in polymers 941
Etching
mechanism of, in R.F. discharges 1287
plasmaphysics of plasma 1311
Ethanol, purification and tests for impurities 855R
Evaluation of fiber surface treatments in composite materials 1659

Fats and oils
standard method for determination of total sterols in 899R
standardised method for determination of triglycerides in 1515R
Fiber surface treatments in composite materials 1659
* Film balances, reporting experimental pressure-area data with (Recommendations 1984) 621R
Fission products, thermodynamics of vaporization of 1
Flotation of ion-association compounds of complexes of multi-charged anions with basic dyes 849R
Fluid mixtures, phase equilibria 89
Fluoroimmunoassays, high sensitivity pulsed light, time-resolved 473
Fluorometric assays, laser-excited, for monitoring toxic chemical exposure 543
Foodstuffs, determination of mercury in 1507R
Fossil fuels
calorimetric and thermoanalytical approaches to problems related to 69
genesis, extraction and use 69
Fourier transform
infrared spectroscopy of polymers 971
NMR stopped-flow and high-pressure flow 347
Fracture mechanics, characterisation of toughened polymers using 1679

* Gas/solid systems, reporting physisorption data for (Recommendations 1984) 603R
Gases in liquids, solubility of, a critical review 303
General aspects of trace analytical methods
VI: bulk analysis of semiconductor materials 1133R
VII: distribution analysis of semiconductor materials 1153R
Geochemistry, thermodynamic aspects of 31
Glass electrodes, procedures for testing pH responsive 887R
Glycosidases, serum and urine, diagnostic potential in acquired diseases 543
Graphite, metals dispersed on, in organic synthesis 1887
Guanosine recognition and RNA hydrolysis by ribonuclease T_1, mechanism of 417

Haematology, new developments in 557
Heat transfer to particles in thermal plasma flows 1179
High sensitivity pulsed light, time-resolved fluoroimmunoassays 473
HPLC – a powerful tool in carotenoid research 793
Hybrid binders in polymer composites 1691

Identification and control of purity of acid-base indicators 845R
Immunoassay(s)
chemiluminescence 523
enzymes, for detection of microbial antigens in body fluids 583
Inductively coupled R.F. plasma 1321
Influence of preferential solvation on transport properties of electrolytes 369
* Inorganic and coordination polymers, nomenclature for (Recommendations 1984) 149R
Interaction of tRNA with its biological partners 405
Interfacial effects in composites 1667
Intermediate state interactions in optical processes 201
Ion
association compounds of complexes of multicharged anions with basic dyes 849R
reactions and kinetics in plasmas 1223
Ionic hydration by neutron scattering 1025
Ions
gas phase and solution-dipolar solvents 339
plasma-surface interactions in 1253
single, thermodynamic functions of transfer from water to nonaqueous and mixed solvents 1103R, 1129R
Isotopes in carotenoid biochemistry, stable 701

Kinetics
associated with semiconductor-based photoelectrochemical cells 57
in plasmas 1223

Laser-excited, fluorometric assays for monitoring toxic chemical exposure 543
Ligand substitution reactions in non-aqueous solvents by NMR 347
Liquid chromatography, detection in, based on different luminescence principles 483
Liquid crystal (crystalline)
polyesters, structure-order relationships in 1537
polymers, deuteron NMR methods for studying molecular order and motion 1617
polymers, rheology of 1545
polymers, spectroscopic investigation of local molecular dynamics in 1563
polymers, synthesis, structure and properties 1009
polymers with side-chain mesogenic groups 1715
side-chain polymers, synthesis and structure 1589
Lithium battery technology, analytical problem solving in 383
LO phonons, allowed and forbidden scattering by 181
Local order due to electrostatic interactions 1051

Low pressure plasmas, optical diagnostics of 1265
Luminescence (Luminescent)
chemiluminescence immunoassay 523
detection in liquid chromatography 483
determination of clinically and agriculturally important samples 495
measurements on surfaces 515
spectrometry in biomedical sciences, International Symposium, Ghent, September 1984 471–529
spectroscopy, principles of 495
techniques, characterization of solid polymers by 945

Macroions, rodlike, studies on dilute solutions of 905
Marcromolecular interactions in protein synthesis 405
Macromolecules, 28th Microsymposium, Prague, July 1985 1639–1711
Magnetic
properties, application in characterisation of bonding 1363
Raman optical activity 215
Marine animals, new structures of carotenoids in 659
Mass spectrometric techniques in clinical laboratory 571
Mathematical modelling and measurements and application and development, comparisons between 1171
MD simulations, structure of aq. electrolyte solutions as derived from 1031
Mechanical properties for short fiber composites, achieving desirable 1651
Mechanism(s) of
energetic molecule ejection from surfaces 1245
etching, polymerization and deposition in R.F. discharges 1287
guanosine recognition and RNA hydrolysis by ribonuclease T_1 417
Melting, boiling, and critical point data of alkali metals, assessment of 1407R
Mercury in foodstuffs, determination of 1507R
Mesophase pitch and its carbon fibers 1553
Metabolic transformations of carotenoids in rainbow trout, salmon and chicken 685
Metal(s)
amide catalyzed amination of olefins 1917
in mercury, temperature coefficients and activity coefficients 169R
ligand bond-energies in organometallic compounds 79
Metallurgy, extractive, plasma spraying and 1171
Methanol
purification and tests for impurities 855R
water mixtures, insights into solute–solute–solvent interactions from transport property measurements with reference to 1083
Microbial
adaptation to pesticides 389R
antigens in body fluids, enzyme immunoassays for detection of 583
Microphase separation, peculiarities of structure and properties conditioned by 1691
Model
ecosystems, critical evaluation of 1523R
polymer fluid systems 921
Modulated structures, electron microscopy and diffraction of 1373
Molecular
characteristics of linear low density polyethylenes 823R
diffusion in polymeric systems 1681
dynamics (local) in liquid crystal polymers 1563
order in solid polymers, characterisation by rheo-optical FT-IR 1603
order in solid polymers, deuteron NMR methods for studying 1617
structure of polyvinylchloride, defects in, and their relation to thermal stability 833R
Molecules, dissociation of, in plasma and gas 1235
Momentum transfer to particles in thermal plasma flows 1179
Monoclonal antibodies, substitution of traditional antisera by 577
Morfometry of white blood cells 599

Natural
abundance of ^{17}O NMR line broadening 347
products, absolute configuration of *in situ* transition metal complexes of ligating 441
products, chemistry of, International Symposium, Poznan, July 1984 (additional lectures) 405–470
waters, physical chemistry of 1015
Neurospora, carotenogenic enzymes from 667
Neutron scattering, ionic hydration by 1025
Ni complexes relevant to catalysis, chemistry of organopalladium and 1799
NMR
of carotenoids, new experimental techniques 801
techniques in clinical laboratory 575
* Nomenclature
for copolymers, source-based (Recommendations 1985) 1427R
for regular single-strand and quasi single-strand inorganic and coordination polymers (Recommendations 1984) 149R
for thermal analysis-IV (Recommendations 1985) 1737R
symbols, units and their usage in spectrochemical analysis-V: Radiation sources (Recommendations 1985) 1453R
Non-aqueous
solutions, 9th International Conference, Pittsburgh, August 1984 337–388
solvents, probing ligand substitution reactions in, by NMR 347
Non-crystalline order in polymers, International Symposium, Naples, May 1985 1537–1638
Non-electrolytes, theories of solubilities of 273

Olefins, metal amide catalyzed amination of 1917
Onsager treatment, theories of transport properties using 1091
Optical
diagnostics of low pressure plasmas 1265
processes, intermediate state interactions in 201

Optical *contd.*
* spectroscopy, names, symbols, definitions and units of quantities in (Recommendations 1984) 105R
waveguides, preparation of 1299
Optically active carotenoids, synthesis of 735
Order and disorder in transition metal carbides and nitrides 1391
Organic electrophiles, Pd-catalyzed coupling of organotin reagents with 1771
Organic
mixtures, thermodynamics of binary liquid 15
polyhalides to olefins, cu-catalyzed additions of 1827
Organic synthesis
in industry, organometallic reactions in 1809
organometallic chemistry directed toward, 3rd International Symposium, Kyoto, July 1985 1741–1917
potassium graphite in 1887
Organoboron compounds in new synthetic reactions 1749
Organometallic
chemistry directed toward organic synthesis, 3rd International Symposium, Kyoto, July 1985 1741–1917
compounds, metal-ligand bond-energies 79
reactions in organic synthesis in industry 1809
Organopalladium and Ni complexes relevant to catalysis 1799
Organosilicon reagents, selective C—C bond formation based on 1759
Organotin reagents, Pd-catalyzed coupling with organic electrophiles 1771
Organotitanium reagents, selective reactions of 1781
Oxidation and stabilization of polymers 1727

Particle in box model for resonance Raman scattering in polyacetylene 235
Pd-catalyzed coupling of organotin reagents with organic electrophiles 1771
Pesticides
microbial adaptation to 389R
report 19: microbial adaptation to 389R
report 20: critical evaluation of model ecosystems 1523R
pH
determination in low ionic strength fresh waters 877R
measurements in organic solvents 865R
in water + organic solvent mixtures 865R
responsive glass electrodes, testing 887R
* scales: definition, measurement and related terminology (Recommendations 1984) 531R
Phase equilibria
aqueous inorganic, at high temperatures 283
in fluid mixtures 89
Photochemical transients in ms to ps time scale, time-resolved resonance Raman spectra of 187
Photoelectrochemical cells, semiconductor-based 57
Photoregulation of carotenoid biosynthesis in plants, mechanism of 777
Photosynthesis, carotenoids in 723
Phycomyces, carotenogenic enzymes from 671
* Physisorption data reporting for gas/solid systems with special reference to determination of surface area and porosity (Recommendations 1984) 603R
Picosecond timescale Raman processes and spectroscopy 195
Plant(s)
carotenoids of lower 649
mechanism of photoregulation of carotenoid biosynthesis in 777
photoprotection, carotenoids in 729
Plasma
and gas, dissociation of molecules in 1235
basic ion reactions and kinetics in 1223
chemistry, 7th International Symposium, Eindhoven, July 1985 1171–1362
deposition, review of applications 1299
flows, thermal, heat and momentum transfer to particles in 1179
inductively coupled radio frequency 1321
optical diagnostics of low pressure 1265
phase, applications of plasma surface modifications and correlations with chemical properties of 1207
physics of plasma-etching 1311
polymerization, applications of 1277
spraying and extractive metallurgy 1171
surface interactions, elementary processes 1253
surface modifications, applications of 1207
thermal, deposition of alloys and ceramic fine particles 1197
Plastic flow, chemistry and physics of 1707
Polyacetylene, particle in box model for resonance Raman scattering in 235
Polyethylene(s)
composites, ultra high modulus 1641
relationship between molecular characteristics and physical properties of linear low density 823R
terephthalates, rheological properties and unstable melt spinning characteristics 1441R
Polymer(s)
85, International Symposium, Melbourne, February 1985 905–1014
characterization and analysis by size exclusion chromatography 955
characterization and analysis, International Symposium, Melbourne, February 1985 905–1014
characterization of molecular, in solid 1603
characterization of toughened, using fracture mechanics 1679
composites, 28th Microsymposium, Prague, July 1985 1639–1711
fluid systems, model 921
FT-IR spectroscopy of 971
local MD in liquid crystal 1563
NMR methods for studying molecular order and motion in solid and liquid crystalline 1617
* nomenclature for regular single-strand and quasi single-strand inorganic and coordination (Recommendations 1984) 149R
non-crystalline order in, International Symposium, Naples, May 1985 1537–1638
rheology of liquid crystalline 1545
science and technology, applications of solubility and other cohesion parameters 905
solid, characterization by luminescence techniques 945
solubility of 323

Polymer(s) *contd.*

structural defects in, their identification and significance 985
surfaces, synthesis, characterization, modification and degradation of, as revealed by ESCA 941
synthesis and structure of liquid crystalline side-chain 1589
synthesis, structure and properties of liquid crystalline 1009
thermotropic liquid crystalline, characterization of 977
u.v. microscopy to study oxidation and stabilization 1727
x-ray scattering measurements of order in non-crystalline 1627
Polymeric systems, molecular diffusion in 1681
Polymerization
mechanisms of poly (vinyl chloride) and related copolymers 1001
plasma, applications of 1277
Polyvinylchloride
defects in the molecular structure of, and their relation to thermal stability 833R
polymerization mechanisms, studies by ^{13}C NMR 1001
structures of, studies by ^{13}C NMR 1001
unplasticised (uPVC) pipe, brittle failure of 993
Potassium-graphite and metals dispersed on graphite in organic synthesis 1887
* Pressure-area data, reporting experimental, with film balances (Recommendations 1984) 621R
Processing of composite structures 1701
Protein synthesis
in bacteria, thermodynamic aspects of regulation 45
macromolecular interactions in 405
Purification of solvents
dioxane, for electroanalysis 633R
ethanol, and tests for impurities 860R
methanol, and tests for impurities 855R
tetrahydrofuran, for electroanalysis 633R
Pyrrolizidine alkaloids, biosynthetic routes leading to, stereochemical aspects 453

Quantitative
cytometry, aspects of 587
luminescence spectrometry in biomedical sciences, International Symposium, Ghent, September 1984 471–529
Quinolizidine alkaloids, biosynthetic routes leading to, stereochemical aspects 453

* Radiation sources, nomenclature, symbols, units and their usage in (Recommendations 1985) 1453R
Radio frequency (R.F.)
discharges, etching, polymerization and deposition in 1287
plasma, inductively coupled 1321
Raman spectroscopy
9th International Conference, Tokyo, Aug./Sept. 1984 181–251
magnetic Raman optical activity 215
picosecond time scale Raman processes and 195
Raman electron paramagnetic resonance 215

Raman spectroscopy *contd.*

resonance, enzyme substrate reaction intermediates determined by 225
resonance Raman scattering in polyacetylene 235
time-resolved resonance Raman spectra of photochemical transients in ms to ps time scale 187
Rayleigh-Brillouin scattering, studies of rotation-translational coupling and bulk-viscosity relaxation 247
Reaction rates, solvent effects on 1055
Reactor accident conditions, thermodynamics of vaporization of fission products under 1
Red blood cells, cytometric approaches to 593
Refractory borides, structure, defects and properties of 1383
Resonance Raman
scattering in polyacetylene 235
spectroscopy of carotenoids 785
Retinals, synthesis of ^{13}C-labelled 753
Retinoids, natural carotenoid metabolites and their synthetic analogs 709
Rheological properties and unstable melt spinning characteristics of linear and branched polyethylene terephthalates 1441R
Rheology of liquid crystalline polymers 1545
Rheo-optical FT-IR, characterization of molecular order in solid polymers by 1603
Rhodopsin, bioorganic studies with 769
Rodlike macroions, studies on dilute solution of 913
Rotation-translational coupling of liquids composed of anisotropic molecules 247

Salting-out and ionic hydration 263
Scattering by LO phonons, allowed and forbidden 181
Selective
C—C bond formation based on organosilicon reagents 1759
reactions of organotitanium reagents 1781
Semiconductor materials, trace analysis of
part A: bulk analysis 1133R
part B: distribution analysis 1153R
Serum and urine glycosidases in acquired diseases, diagnostic potential of 547
Short fiber composites, achieving desirable mechanical properties for 1651
* Single-strand inorganic and coordination polymers, nomenclature for (Recommendations 1984) 149R
Solid
compounds of transition elements, 8th International Conference, Vienna, April 1985 1363–1406
state magnetism with special reference to transition metal compounds 1403
Solubility
data in binary mixtures MCl-H_2O 255
local changes, induced by electrolytes 263
of gases in liquids: a critical review 303
of polymers 323
parameters, applications in polymer science and technology 905
phenomena, 1st International Symposium, London, Ont., August 1984 253–336

Solute–solute–solvent interactions
7th International Symposium, Reading, July 1985 1015–1102
insights into, from transport property measurements 1083
Solvation, influence of preferential, on transport properties of electrolytes 369
Solvent effects on reaction rates 1055
* Source-based nomenclature for copolymers (Recommendations 1985) 1427R
* Spectrochemical analysis, nomenclature, symbols, units and their usage in—V: radiation sources (Recommendations 1985) 1453R
Spectroscopic investigation of local MD in liquid crystal polymers 1563
* Spectroscopy, optical, names, symbols, definitions and units of quantities in (Recommendations 1984) 105R
Standard
method for determination of total sterols in fats and oils 899R
method for determination of triglycerides in fats and oils 1515R
potentials of amalgam electrodes in aqueous solutions 169R
potentials of selected electrodes 1129R
* reference values, pH scales (Recommendations 1984) 531R
Standardization of pH measurements in organic solvents 865R
Stereochemical aspects of biosynthetic routes leading to pyrrolizidine and quinolizidine alkaloids 453
Steroid synthesis, co-mediated 1819
Sterols in fats and oils, standard method for determination 899R
Structural defects in polymers, their identification and significance 985
Structure
and dynamics of enzyme-substrate reaction intermediates determined by resonance Raman spectroscopy 225
defects and properties of some refractory borides 1383
of carotenoids in marine animals 659
of carotenoids, old and new problems 639
of liquid-crystalline side-chain polymers 1589
order relationships in liquid crystalline polyesters 1537
Supercritical temperatures, aqueous mixtures to 1065
* Surface area and porosity determination, reporting physisorption data for (Recommendations 1984) 603R
Surfaces, luminescence measurements on 515
Synthesis
and C—C bond-forming reactions of W, Mo, and Re enolates 1789
characterization, modification and degradation of polymer surfaces as revealed by ESCA 941
of ^{13}C-labelled retinals 753
of liquid-crystalline side-chain polymers 1589
of optically active carotenoids 735
structure and properties of liquid crystalline polymers 1009
Synthetic
advances in the carotenoid field 741
reactions, organoboron compounds in new 1749
* Terms, symbols, and definitions for electroanalytical chemistry (Recommendations 1985) 1491
Ternary transition metal chalcogenides with framework structures 1363
Test data for normal coordinate calculations 121R
Tetrahydrofuran, purification for electroanalysis 633R
Theoretical studies of aqueous solution structure 1043
Theories of
solubilities of non-electrolytes 273
transport properties using Onsager treatment 1091
Thermal
* analysis, nomenclature for – IV (Recommendations 1985) 1737R
plasma deposition of alloys and ceramic fine particles 1197
plasma flows, heat and momentum transfer to particles in 1179
Thermoanalytical approaches to problems related to fossil fuels 69
Thermodynamic(s)
aspects of geochemistry 31
aspects of regulation of protein synthesis in bacteria 45
associated with semiconductor-based photoelectrochemical cells 57
chemical, International Conference, Hamilton, August 1984 1–103
functions of transfer of single ions from water to nonaqueous and mixed solvents 1103R, 1129R
of binary liquid organic mixtures 15
of vaporization of fission products 1
of vaporization of materials under severe reactor accident conditions 1
Thermotropic liquid crystalline polymers
characterization of 977
with side chain mesogenic groups, cholesteric phases in 1715
Ti-mediated asymmetric oxidation, route to chiral sulfoxides 1911
Time-resolved resonance Raman spectra of photochemical transients in ms to ps time scale 187
Toxic chemical exposure, laser-excited, fluorometric assays for monitoring 543
Trace
analysis of semiconductor materials: bulk and distribution analysis 1133, 1153R
substances, separation and preconcentration 849R
Traditional antisera substitution by monoclonal antibodies 577
Transition
elements, solid compounds of, 8th International Conference, Vienna, April 1985 1363–1406
metal carbides and nitrides, order and disorder 1391
metal carbonyl oestrogen receptor assay 1865
metal complexes of ligating natural products 441
metal compounds, solid state magnetism with special reference to 1403
metal (ternary) chalcogenides framework structures 1363

Transport properties of electrolytes for applied research and technology 1071
from infinite dilution to saturation 355
in mixed-solvent solutions 369
Transport property measurements, insights into solute–solute–solvent interactions from 1083
Triglycerides in fats and oils, standardised method for determining 1515R
Tungsten, Mo, and Re enolates, synthesis and C—C bond-forming reactions of 1789

Ultra high modulus polyethylene composites 1641
uPVC pipe, understanding brittle failure of 993

U.v. microscopy, oxidation and stabilization studies on polymers 1727

Waters
fresh, pH determination in low ionic strength 877R
natural, physical chemistry of 1015
Waveguides, preparation of optical 1299
White blood cells, morfometry of 599

X-ray scattering measurements of order in non-crystalline polymers 1627

Errata

Volume, Issue and Year	Page no. and location	Correction
56, 8 (1984)	1102 Solvent: Molten Salts Column 1, item 6	for $CuCl_2/KCl$ read $CaCl_2/KCl$
57, 6 (1985)	903 Section 6.4 line 1	for cholesterol oxygen oxidoreductase read cholesterol oxidase suspension
	903 Section 6.5 line 1	for (catalase-suspension 1) read (catalase-suspension)
	903 Section 7.2 line 3	for catalase-suspension 1 (6.5) read cholesterol oxidase suspension (6.4)
